Abstract

The objectives of the study were to enquire the understanding of Personality Development of Senior Secondary School Students. The investigator has proposed to adapt Survey Method for the present study. The population selected for the study is senior secondary school students of Patna. For this study, 300 samples of senior secondary school students were randomly chosen from five government and non-government schools of Patna district. The investigator has used Self constructed and validated Personality Test (2014) tool. Statistical techniques used are mean, standard deviation and t-test. The findings of the study show that there is a significant difference between the mean score of senior secondary school students in their understanding of personality on the basis of habitation.

Keywords: Understanding, Personality Development, Secondary school.

I. INTRODUCTION

Education is the process of bringing desirable changes in the behavior of human beings. It can also be defined as the process of imparting and acquiring knowledge and habits through instructions or studies. Education comprises transmittance, study and reflection, discussion and demonstration. Education is as old as human race. It is a never ending process of inner growth and development. Its period stretches from cradle to the grave. Education helps human beings to increase and develop their thinking and reasoning, problem solving and creativity, intelligence and aptitude, sentiments and skills, good values and attitude. Human being learns something or the other every day and every moment. His/her entire life is education. Hence, Education is an activity or a process, which transforms the behavior of a person from instinctive behavior to human behavior.

An individual's personality is an aggregate conglomeration of the decisions they have made throughout their life and the memory of the experiences to which these decisions led. There are inherent natural, genetic, and environmental factors that contribute to the development of our personality. According to process of socialization, "personality also colors our values, beliefs, and expectations ... Hereditary factors that contribute to personality development do..."
so as a result of interactions with the particular social environment in which people live." According to Woodworth (1938)—Personality is the total quality of an individual’s behavior as it is revealed in his characteristic, habits of thought and expression, his attitudes and interests, his manner of acting and his personal philosophy of life. Deep within lies in every individual a powerful urge to grow up and blossom out as a person – to be distinguished from the sub-human species. The quest for everyone is to become a person as Carl Rogers says and develop one’s personality.

II. SIGNIFICANCE OF THE STUDY

Personality Development is a tool through which one can bring out his/her capabilities and his/her strengths making oneself aware of his/her inner self and become more confident to face the outside world. As far as students are concerned, effective use of technology can help the students to face and meet the challenges of the outside world more effectively and efficiently. Personality involves good communication skills, confidence, proper body language and etiquette’s. The overall personality of students in terms of communication skills, presentation skills and developed leadership, negotiation and self studying skills while teaching them how to manage time.

III. STATEMENT OF THE PROBLEM

An Understanding of Personality Development of Senior Secondary School Students of Patna

Students- A learner who attends a school.
IV. OBJECTIVES OF THE STUDY
1. To find whether there is significant difference the mean score of Senior Secondary School students in their personality development on the basis of gender.
2. To find whether there is significant difference the mean score of Senior Secondary School students in their personality development on the bases of standard.
3. To find whether there is significant difference the Senior Secondary School students in their personality development on the bases of area of habitation.
4. To find whether there is significant difference in the mean score of Senior Secondary School students in their personality development on the basis of type of school.
5. To find whether there is significant difference the mean score of Senior Secondary School students in their personality development on the basis of medium of instructions.
6. To find whether there is significant difference the mean score of Senior Secondary School students in their personality development on the basis of nature of family.
7. To find whether there is significant difference in the mean score of Senior Secondary School students in their personality development on the basis of type of school.

V. TOOL USED
Self constructed and validated tool on Personality Test (2014)

VI. METHOD USED
The investigator method adopted for the present study is the survey method for the present study.

VII. POPULATION FOR THE STUDY
For the present study, the population selected as Senior Secondary School Students of Patna Patna city district of Bihar State.

VIII. SAMPLE
There were 200 students Patna Educational District of Bihar State.

IX. STATISTICAL TECHNIQUES USED
1. Mean
2. Standard Deviation
3. t-ratio

X. DELIMITATIONS OF THE STUDY
1. The researcher has taken the sample from the state of Bihar.
2. The researcher has taken 200 samples.
3. The researcher has taken Secondary school students of Bihar state for the study.
4. Most of the samples are from Patna schools situated at urban from the state of Bihar.

XI. NULL HYPOTHESIS
1. There is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of gender.
2. There is no significant difference between the mean score of Senior Secondary School students’ personality development on the bases of standard.
3. There is no significant difference between the Senior Secondary School students in their personality development on the bases of area of habitation.
4. There is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of type of school.
5. There is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of medium of instructions.
6. There is no significant difference between the mean score of Senior Secondary School students personality development on the basis of type of school.
7. There is no significant difference between the mean score of Senior Secondary School students, personality development on the basis of nature of family.

XII.1 Null Hypothesis 1
There is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of gender.

<table>
<thead>
<tr>
<th>Gender</th>
<th>No. of Students</th>
<th>Mean</th>
<th>SD</th>
<th>t-ratio</th>
<th>Level of Significance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Male</td>
<td>120</td>
<td>128.03</td>
<td>15.258</td>
<td>0.697</td>

</tr>
<tr>
<td>Female</td>
<td>180</td>
<td>129.14</td>
<td>12.430</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(At 5% level of significance, the table value of ‘t’ is 1.96)

It is inferred from the above table that there is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of gender.

2 Null Hypothesis 2
There is no significant difference between the mean score of Senior Secondary School students’ personality development on the bases of standard.
Table - II

<table>
<thead>
<tr>
<th>Standard</th>
<th>No. of Students</th>
<th>Mean</th>
<th>SD</th>
<th>t- ratio</th>
<th>Level of Significance</th>
</tr>
</thead>
<tbody>
<tr>
<td>11th</td>
<td>130</td>

<td></td>
</tr>
</tbody>
</table>

(At 5% level of significance, the table value of ‘t’ is 1.96)

It is inferred from the above table that there is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of type of school.

XII.5 Null Hypothesis 5

There is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of medium of instructions.
It is inferred from the above table that there is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of medium of instructions.

XII.6 Null Hypothesis 6
There is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of type of school.

It is inferred from the above table that there is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of type of family.

XII.7 Null Hypothesis 7
There is no significant difference between the mean score of Senior Secondary School students’ personality development on the basis of type of family.

XII. CONCLUSION
Personality is the total quality of an individual’s behavior as it is revealed in his characteristic, habits of thought and expression, his attitudes and interests, his manner of
acting and his personal philosophy of life. Deep within lies in every individual a powerful urge to grow up and blossom out as a person – to be distinguished from the sub-human species. The overall personality of students in terms of communication skills, presentation skills and developed leadership, negotiation and self studying skills while teaching them how to manage time.
