Abstract

This paper is devoted for analyzing three important factors responsible for development of teachers’ trainees’ graduation level effective teaching. The conceptual and psychological factors how far influence teaching of the teachers trainees at graduation level are critically analyzed with different research finding in India and abroad. Operational definition and conceptual interrogations of the factors how far contribute perfection and understanding of teaching learning process with different psychologist views. In the modern developing society, man rarely performs dual role but modern development has created such situation for the women that she has to perform dual role. This situation has both negative and positive aspects. The view on above concepts how far helps to teachers for better teaching is a remarkable question trying to answer by this paper. This is known as teaching competence. In other words, teacher competence refers to “the right way of conveying units of knowledge, application and skills to students”. The right way here includes knowledge of content, processes, methods and means of conveying content. Any definition of teaching competence depends on teaching in a particular setting, the culture and values held in the community. Overall these above three factors are considered for teaching and teacher’s interests with productive values are exercised.

1.0.0 INTRODUCTION

There are a large number of instructional and related activities to be performed by the teacher inside and outside the classroom. These activities are of varied types. The effective organization of these activities would require that a teacher possesses a certain amount of knowledge and also certain attitudes and skills. This is known as teaching competence. In other words, teacher competence refers to “the right way of conveying units of knowledge, application and skills to students”. The right way here includes knowledge of content, processes, methods and means of conveying content. Any definition of teaching competence depends on teaching in a particular setting, the culture and values held in the community. It also depends on the innumerable teacher and student characteristics and the classroom context. The effectiveness or ineffectiveness of teaching is closely linked to teaching competence. Competent teacher would also create classroom conditions and climate, which
are conducive for student learning. Teaching competency has various dimensions such as content knowledge, instructional planning, student motivation, presentation and communication skills, evaluation competencies and classroom management skills. While the teacher would require all these dimensions to a reasonable extent, it is in the manifestation of these in an integrated manner that makes him effective in the classroom context.

1.2.0 Common Teaching Competencies

1) Competency I: Subject Matter Knowledge- The effective early childhood, elementary, middle/secondary school teacher demonstrates knowledge of:
   a) The subject matter of Early Childhood, Elementary, Reading, Middle, or Secondary School education, including literature and the language arts, mathematics, science, social studies, the arts, health and physical education
   b) The physical, social emotional, intellectual and moral development of adolescents, both with and without special needs;
   c) Multidisciplinary structures, teaming and interdisciplinary planning;
   d) The relationships among the disciplines taught in the middle/secondary school.

2) Competency II: Communication Skills. The effective teacher-
   a) Communicates sensitively with language appropriate to students’ ages, levels of development, gender, race, and ethnic, linguistic and socioeconomic backgrounds, as well as individual learning styles and needs;
   b) Interacts with students, families, and colleagues.

3) Competency III: Instructional Practice. The effective teacher-
   a) Understands typical and atypical human development and is familiar with principles of curriculum and instruction, including strategies for integrating special education students into regular classroom settings and developing and implementing individualized Educational Plans (IEPs);
   b) Teaches through diverse modes, including new technologies, reading and language arts as appropriate to age, learning style and developmental stage of the learner;
   c) makes curricular content relevant to the experiences of students from diverse racial, socioeconomic, linguistic and cultural backgrounds;
   d) Organizes and manages a classroom to support the growth and learning of diverse students;
   e) Uses methods that develop students’ academic and social skills;
   f) Works effectively with families and community sources.
4) Competency IV: Evaluation. The effective teacher-
   a) Designs and uses various evaluative procedures to assess student learning;
   b) Evaluates his or her own teaching behavior, and uses the results to improve student learning.

5) Competency V: Problem Solving. The effective teacher-
   a) Thinks critically about teaching and learning;
   b) Fosters students’ creative and analytical thinking skills.

6) Competency VI: Equity. The effective teacher-
   a) Deals equitably and responsibly with all learners;
   b) Understands the impact of western and non-western civilizations on contemporary American culture and uses this knowledge to develop appropriate strategies.

7) Competency VII: Professionalism. The effective teacher-
   a) Understands his or her legal and moral responsibilities;
   b) Learns from experience and supervision;
   c) Understands the impact of societal problems that can affect student learning.

1.3.0 PERSONALITY
Personality refers to "that which permits a prediction of what a person will do in a given situation. The goal of psychological research in personality is to establish laws about, what different will do in all kinds of social and general environmental situations. Personality is concerned with all the behaviour of the individual both over and under I-lic skin." (R.B. Cattle)

1.3.1 PERSONALITY TRAITS
Personality traits defined in terms of sixteen personality factors as measured by personality questionnaire by Dr. R.B. Cattle (16 PFQ) which was adopted in Hindi (Indian Conditions) by Dr. S.D. Kapoor.

1.4.0 VALUES
Values play an important role in an individual's life. They are socially approved -desires or goals, conceptions or standard by which things are approved or disapproved. "According to its verbal meaning value signifies the importance and utility of a thing. According to E.S. Brightman, "In primary, sense value means what the individual likes, accept and enjoys."
1.5.0 CRITICAL VIEWS

The aim of the study was to identify desirable teaching competencies of a physics teacher considering the presage, process and product variables of competency. Two approaches, factor analysis as well as content analysis involving student’s view were used to identify desirable competencies. He arrived at fourteen general teaching competencies. Some of them are competency of teachers’ concern for pupils, competency in using audio-visual aids, competency of professional perception, logical exposition, competency in classroom management, competency in giving assignment, competency in initiating pupil participation etc. The Factorial Structure of Teaching Competencies among Secondary School Teachers are influence teaching. The aim of the study was to analyse the teaching competency of secondary school physics teachers of class IX. He reported the general teaching competency included competencies like competency in using audiovisual aids, competency in illustrating with numerous examples, competency in using variety of evaluation techniques, competency in evoking maximum involvement of students, competency in recognizing the attending behaviour, competency in achieving closure etc.

Review of Related Study

Chowdhary K (1985) conducted a study “A factorial study of teaching competencies of teachers teaching English at the secondary school level”. The study revealed (i) there is a positive correlation of all the competencies with product variables (ii) competencies were influenced by locality of the school and (iii) Educational qualification and sex were found to be related to teacher competencies.

Anuradha Joshi and Preethidhar Parja (1986) in their study “Personality, a Correlate of Teaching Competency” attempted to study the personality characteristics of teacher trainees. They concluded that professionally competent teachers possess, so far as statistical significance is concerned, personality characteristics like boldness, confidence, imagination, experimentation, relaxed nature, reservedness and possession of high self-respect.

Prakasham (1986) studied effectiveness as a function of school organizational climate and teaching competency. In this study he observed -
i. Teachers working in schools situated in urban areas were better than teachers of all other areas on both teaching competency as well as teacher effectiveness.

ii. No significant difference was found in the teacher competency and teacher effectiveness of the teachers working in the government and non-government schools in global term.
iii. No significant difference was observed between male and female teachers on the tests of teaching competency.

Goyal J.C, Pandey and Damayanti (1987) conducted a study on “General teaching competency and attitude of economics teachers teaching at a higher secondary level”. The major findings of their study are.

i. Majority of teachers possess average or below average teaching competency where as the number of teachers who possess above average teaching competency is very low.

1.6.0 CONCLUSION

It was found that with the objectives of Kambhampati Prasad (2007) studied about “The influence of competence of Teachers on their English Teaching Ability”. The major findings of his study are; 1) There is a high significant positive relationship between teaching competence of a teachers and their ability to teach English Language; 2) Teaching Aptitude of teachers and Teaching competence have significant positive correlation; 3) There is a significant positive relationship between motivation and competence; 4) There is a significant difference in teaching competence of male and 78 female teachers and 5) There is no significant relationship between teaching competency and academic qualification of teachers.

In the aforesaid context, the present researcher, therefore, discussed to study and compare the personality, values and teaching competencies of B.Ed. Teachers trainees.
